

Door Video Camera | 110° angle | IR Night Vision | IP66 | Metal

General information

See who is coming to your door - whether it's day or night - with this wide-angle camera.

With night vision and supporting two-way communication, this camera can be connected to any Nedis® indoor unit to complete or expand your video door intercom system.

The camera is weatherproof for outdoor use and offers a viewing angle of 92°.

As part of a modular system it can be expanded to include two outdoor units, four indoor monitors and eight door cameras (two serving each monitor).

Features

- Wide-angle door camera - offering you a comprehensive 92° view of who is outside your door
- IR night vision - for a clear view day or night
- Cable is extendable up to 100 m (extension material not incl.) - to make it possible to connect to an accessible monitor
- Weatherproof to IP66 - for outdoor use
- Can be used as part of an extended modular system - compatible with all Nedis® outdoor units and indoor monitors
