

Powerbank with Wireless Charger | 5000 mAh | 1 x 2.4 A | 1 x USB output | Black

General information

Forget the cables and clutter - and the need to plug your phone in and out to charge it. This Nedis® powerbank is Qi-enabled: simply pop your smartphone on the charging pad to replenish the battery - completely without wires, as long as the charged device is Qi-compatible. The LED indicator shows it's actually charging and the suction cups keep your mobile phone safely in place. The powerbank has the capability to charge 2 devices simultaneously, saving valuable time and the need for a power socket nearby.

Features

- Charges smartphones up to 2 times
- USB-A output and Micro USB input
- Complete with USB charging cable
- Capacity: 5000 mAh
- Qi-certified charging
- With suction cups

Specifications
