Airplane Bluetooth® Transmitter

to stream audio towards your Bluetooth® headphones

Features and benefits

- Designed to use in an airplane - Connect it to an entertainment system with Bluetooth® and use your own Bluetooth® headphones during airplane flights
- Use it as a gaming headset by connecting it to a Nintendo Switch™
- Compatible with HiFi systems that don't have a Bluetooth® functionality
- Built-in rechargeable battery to use without another power source
- Foldable and lightweight design - the individually foldable 3.5 mm audio stereo and mono pins allow you to easily store this compact device when needed
- Built-in 200 mAh battery - for 5 hours of constant wireless streaming during your flight
- Easy pairing - the simplistic button design easily allows you to pair up with your headphones
- Charge and stream simultaneously -- keep on listening even while it charges
- LED indicator - for power and connection
