Nedis.com

This Nedis infrared motion sensor prevents the light from burning inadvertently, which is good for the environment - not to mention for your energy bills.

It also adds the convenience of not having to turn the light on manually.

The sensor has adjustable time delay and light sensitivity settings and is also equipped with an on/off/PIR switch at the front.

The infrared motion sensor is easy to install in a standard built-in box with a minimum installation depth of 30 mm (mounting holes 60 mm between the centres).

This model is suitable for 2-wire installations (live and neutral).

Features

- 2-wire installation
- Adjustable ambient light setting
- Adjustable time delay setting
- Built-in depth of only 30 mm
- Mounting holes 60 mm between centres, fitting regular installation boxes
