SmartLife Power Switch

Wi-Fi | 3680 W | Terminal Connection | App available for: Android™ / IOS

Brand: Nedis | Article number: WIFIWMS10WT | Product EAN number: 5412810401406

Inner Carton EAN: 5412810406937 | Outer Carton EAN: 5412810406944

Add smart functionality like remote switching, programming and voice control (in combination with Google Assistant or Amazon Alexa) to your existing lights, just by installing this smart Wi-Fi switch module. Connect it to the free Nedis SmartLife App using nothing but your home Wi-Fi and convert your traditional light into a smart one while still being able to use your existing light switch to switch the light on and off.

The small size (41x41x20mm) enables installing it in the existing junction box, behind any cupboard or above every lowered ceiling.

Note: Neutral wire is required to always power the switch module.

Features

- Make your existing lights smart without removing or disabling your traditional switch
- Control your traditional lights remotely on your smartphone wherever you are
- Program your lights for your own convenience or to simulate your presence while you're away
- Combine with other Nedis® SmartLife products to create scenes or automations
- Small dimensions allow you to install this almost anywhere, including behind your existing switch (depending on exact situation)
