Solar Panel

5.3 V DC | 0.5 A | Micro USB | Cable length: 3.00 m | Accessory for: WIFICB030WT

Brand: Nedis | Article number: SOLCH10WT | Product EAN number: 5412810405978

Inner Carton EAN: 5412810414185 | Outer Carton EAN: 5412810414192

This Nedis solar panel with micro-USB is designed to charge the battery camera WIFICB030WT. This allows you to install your camera anywhere within Wi-Fi range.

High flexibility is ensured due to its extra-long cable, small design and flexible mount. The extra-long cable provides you with the possibility to position the camera in the shade and install the panel anywhere within 3 metres in a sunny spot. The solar panel only produces power due to direct sunlight, so not when the weather's cloudy. But the long-lasting battery of the camera ensures that this does not cause any issues. So with some sun every now and then it will be charged enough to keep running.

Features

- Small design 169x116x2.3mm
- Flexible mount for optimal direction
- Max output power : 3 Watt
- Voltage 5.3 (max.)
- Long cable (3 metres)
