This Nedis Smart dehumidifier is able to extract up to 20 litres\* of moisture from the air per day. Therefore, it's the best way to prevent the build-up of mould, moisture and mildew in your home. A relative humidity of 50-70% is recommended for daily living. There are situations which have a higher or lower humidity level, such as basements, bathrooms or poorly insulated rooms. Equipped with two speed settings to create the perfect air flow for each setting.

The dehumidifier is equipped with five different modes to ensure all user needs are met;

- Dehumidification, the adjustable hygostat keeps the room at a pre-set humidity level
- Continuous, the dehumidifier runs continuously without interruption at low fan speed
