Smart Climate Sensor

Zigbee 3.0 | Battery Powered | Android™ / IOS | White

Brand: Nedis | Article number: ZBSC30WT | Product EAN number: 5412810408863

Inner Carton EAN: 5412810408887 | Outer Carton EAN: 5412810408870

Nedis.com

This Nedis smart climate sensor measures both the room temperature (-10 - 50 °C) and humidity (0 - 95%) in the air, shows it live on the clear display and sends this information to your Nedis SmartLife application. To do this, a Nedis Zigbee gateway (WIFIZBxxx) is required.

This not only allows you to monitor the current room climate but it also enables you to look back at the temperature and humidity changes for the last day, week or month.

By combining this sensor with other products in the Nedis SmartLife range, you can use the temperature or humidity to trigger or control any smart product such as a heater or fan, but also a smart plug to control almost any electrical device.

Features

- Measure temperature and humidity wherever you want within a range of approximately 30 m from the Nedis® Zigbee gateway (WIFIZBxxx)
- Fully integrates with your Nedis® SmartLife application (through the Nedis® Zigbee gateway) to combine with other smart products in automations.
- See both live and stored climate information for the last day, week or month in clear graphs in the app
- Battery powered for flexible placement
- Battery lifetime of up to two years
