

Crimp pliers | CAT5 / CAT5e / CAT6 / CAT6a / CAT7 / RJ11 / RJ12 / RJ45 | Cutting / Plier / Stripping | ABS / Steel | Black

General information

Fast, reliable modular-crimp connection for data and voice-over applications. Ideal for crimping all kinds of Regular CAT7, CAT6, CAT5 and RJ12 connectors (not suitable for pass-through connectors).

Its hardened steel construction is durable and delivers more torque during the crimping cycle. Die head assembly provides 360 degrees of connector support for terminating modular plugs on stranded or solid cable.

Whether you need to upgrade your network or make fast repairs that will last. Platinum Connector RJ45 Crimping Tool is a must-have wire terminating tool. It terminates RJ12 and RJ45 extended copper wires with a precision die head that provides 360 degrees of connector support during the crimping cycle.

Features

- Textured handles provide a non-slip grip for enhanced control and comfort
- Expanded surface area on contact drivers delivers full uniform crimp force for fast, accurate crimping
- Feature to secure the back tail of external shielded connectors
- Ratchet safety release
