Inner Carton EAN: 5412810396320 | Outer Carton EAN: 5412810383368

Fed up with the car radio? You can enjoy your own playlists while driving with this Nedis Bluetooth® 4.2 FM transmitter. With this device you can play music from smartphones or tablets through your car radio.

The metallic rotatory knob gives you a more convenient operation by rotating or pushing it. You can easily go to the previous/next track or answer/hang up phone calls and the built-in microphone enables hands-free calling for safe driving.

But this transmitter is smarter than that: it can also charge your device with its 2.4 A USB connection which enables devices to charge faster at higher voltages. The second connection lets you connect another device to play your own music.

## Features

- Connects to any Bluetooth® device - to wirelessly connect to your car radio
- Bluetooth® 4.2 - for a stable and solid wireless connection
- Rotatory knob - for more convenient operation while driving
- Integrated microphone - to make hands-free calls
- Two USB ports - for charging a USB device with the 2.4 A connection and to play your own music with the other
- LED display - to quickly see the information you need
