Nedis.com

This spotting scope is perfect for hiking or hunting. The rubber on its housing gives you a firm grip and offers protection. The dioptric correction makes it possible to adapt the eye pieces to match your eyesight.

The products is supplied with a Tripod which has a maximum working height of 156cm.

Features

- The spotting scope has a magnification of 20 to 60x.
- The magnification number indicates how many time an object is magnified by the lens. The larger the number the higher the magnification.
- Objective lens diameter: 60 mm
- This indicates how much light is let through the spotting scope lens.
- The bigger the lens the more light comes in but also means the spotting scope will be more heavy.
