This Nedis dash cam records in Full HD 1080p quality. It has a microSD memory card slot (for cards up to 128 GB) and records in a loop, which means that when the memory card is full, it overwrites the previously recorded files.

It will start and stop recording as you start and stop the engine and the motion detection ensures that the camera only records when there is movement in the field of view.

The dash camera is equipped with Wifi, enabling to connect the camera to your phone without disassembling the camera from your car.
